(10-Nov to 30-Nov)

Sprint Planning

- Deployment diagram
- Activity Diagram
- System Sequence Diagram
- Class Diagram
- Start implementation of Proof of Concept
- Update the project report (Activity diagram, sequence diagram , user stories, domain model)
- Start implementing Http request

Sprint Review

- Deployment diagram
- Activity Diagram
- System Sequence Diagram
- Class Diagram (missing Android and IoT part)
- Updated diagram after supervision
- Http request

Sprint Retrospective

What went well:
- Discussion of diagrams together

What can we improve:
- Working two by two instead of all the four of us working on one screen - this way we can do work simultaneously on different tasks
- Reviewing each other's work
