(1-Dec to 7-Dec)

Sprint Planning

TODO
- Update the diagrams
- Test the web socket implementation
- Analysis for dimensional modelling
- Create Star Schema and Source Target mapping
- Initialization of Source Database
- Implementation of saving the payload to the source database
- Initialize the ETL process
- Start to implement the layout
- Continue with http requests

Sprint Review

Data
IoT
Android

Completed Task:
- PoC implementation
- Construction phase handin in
- Domain model review
- Introduction to concept
- Inserting correct values in source database
-
- Introduction (Process report)
- Group description (Process report)
- Project idea (Process report)
- SSD diagram for monitor data
- Class diagram
- Package diagram
- Android login
- Android register
- Android mainPageView
- Figma design

Sprint Retrospective

What went good:
- Most of the implementation are working
- Data transfer and persistence is working

What to improve:
-
